

Project Reference

Rydges Intercontinental Hotel Perth, Western Australia Australia

More information and photos are available on the following link:
<http://www.aomaus.com.au/projects/rydges-intercontinental-hotel-perth/>

Year: 2017
Client: Built
Engineer: Hospitality Total Services

Project:
The InterContinental Hotels Group has signed a redevelopment plan with UNIR Hotels to transform the existing Rydges Hotel into five-star accommodation. The Hotel has been stripped back to a shell and refitted to InterContinental specifications.

AOM Equipment

1 x Type 4 HCFO wall mounted hood with rusted stainless steel cladding for the Tapas Bar

1 x Type 5 Wall mounted HCPFO Series hood built in black stainless steel for the Main Grill

1 x Type 4 HCIFO island hood built in black stainless steel for the Main Kitchen

Further 6 kitchen exhaust hoods.

Finding suitable discharge points has been challenging, which is why the kitchen exhaust requires hi level filtration equipment.

AOM has supplied all the kitchen exhaust hoods for the Hotel revamp, which included 4 main kitchen hoods requiring high efficiency electrostatic filtration as well as dishwashers hoods.

The main kitchen hoods were customized to specific interior design specifications which required manufacturing to use black stainless steel panels and rusted coated finish panels.
